

Recombinant proteins from E.coli
Our current product line is mainly focused
on recombinant cytokines, chemokines
and growth factors

**PROTEIN
MASSIVE SAVINGS**

**15%
OFF**

**PROMO CODE: 17HALLOWEEN
VALID UNTIL
31 OCTOBER 2017**

Promo T&C can be viewed at

Protein Specialist
For more than 2 decades Prospect have worked
to assemble a robust protein portfolio crucial
to life science research

Proprietary HEK293 expression platform
with strict animal-free and xeno-free con-
ditions
In-house developed enzymatic and
chemical biotin labeling technique with
bioactivity and labeling ratio optimized

Human Proteins From Human Cells
Human Proteins From Human Cells
HumanZyme leverages its proprietary engi-
neered human cells, expression vector, and cell
culture media to ensure high-yield production
of recombinant proteins with native human
post-translational modifications, such as disul-
fide bonds and glycosylation.

Native , Recombinant , Active ,
Transmembrane Protein
39 kinds of tags meeting different
demands.
Secondary AKTA-SEC purification to ensure
high purity.
